Discharge

Back side - mount to wall or column

Bracket is fabricated from 12 ga mild steel and reinforced with 1"x1" square tube. The assembly is finished with a zinc plating.

The blower can be rotated 360 degrees in 90 degree increments. This allows for discharge for a variety of requirements.

The blower inlet can be supplied with a number of inlet fittings.

4 - laser cut mounting holes - 1/2"

Note: Overall height varies based on motor selection.
