* Each Coupler Can be Supplied Separately (If Needed)

CONSTRUCTION: 304 Stainless Steel - 20 Gauge

<u>Model</u>	<u>Diameter</u>	<u>Cap & Chain Model</u>	<u>Diameter</u>
MC-3	3"	CC-3	3"
MC-4	4"	CC-4	4"
MC-5	5"	CC-5	5"
MC-6	6"	CC-6	6"
MC-8	8"	CC-8	8"

Typical use for the couplers is when needed changing of accessories is required. Hose and adapters can be supplied with couplers. The typical use for the cap and chain is for the chain to be attached to the body of the female coupler and when there is not an accessory on the female coupler, the cap can then be attached to the female. The male/female coupler components, in many cases, make it easy to change a system over to meet demands. It is a simple matter of pushing the male into female and to turn, therefore locking in place.
