

### MAGNETIC MOTOR STARTER

Provides on/off control for blower motors used as part of a dust collector, protecting the motor from short circuits and running overloads.

\* The manual motor starter relies on manual action to engage the motor starter coil.

\* The magnetic motor starter relies on a magnetic solenoid coil and features a control transformer with finger-safe terminals.

\* Lockable through-the-door disconnect.

\* Type (NEMA/UL) 12 enclosure.

\* IEC three-pole horsepower rated motor starter with short circuit and running overload protection.

#### Equipment Options:

- Oil tight push buttons
- Type (NEMA/UL) 4
- Remote Type (NEMA/UL) 4 push button station
- CSA labeling
