► Markets:

Replacement Systems, New Construction.

Energy efficient air conditioners, furnaces, heat pumps, geothermal systems, in floor systems, zone systems, indoor air quality products, and more!

Crawford represents Bryant products. Bryant, a leading supplier of HVAC equipment, has been dedicated to customer comfort and satisfaction since 1904. Bryant offers exceptional reliability and energy savings through an extensive line of durable heating and cooling products.

SERVICE HEATING & COOLING

► Overview:

Crawford's Service Division has a long standing tradition of effective and efficient work on all makes and models. Crawford's technicians are all NATE and Union certified. Our team has over 150 years of combined field experience. Crawford provides routine clean and checks, in depth analysis and repair, along with 24-hour response. Crawford offers commercial, industrial, and residential service agreements.

► Markets:

Commercial, Industrial, Residential. Available services on: High Efficiency HVAC Equipment, Geothermal Systems, Heat Pumps, Roof Top Equipment, Zoning Systems, Building Automation with Remote Monitoring/Access.

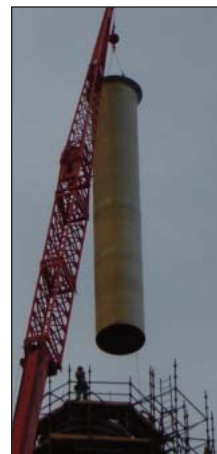

FIBERGLASS REINFORCED PLASTIC SERVICES

► Overview:

Crawford Company is a source for corrosion resistant Fiberglass Fabrication Services. Fiberglass laminated composites are light weight, high strength, non conductive, and corrosion resistant. Crawford assists with design, engineering, drawing, manufacturing, inspection, and installation. Crawford brings together years of fiberglass experience and manufacturing expertise.

► Markets:

Industrial, Water, and Wastewater applications, anywhere corrosion is a problem, fiberglass is the material of choice. Typical products are: Prefabricated Duct Systems, Stacks, Roof Curb Covers, Hoods, Pans, Scrubbers, Ladders, Platforms, Tanks, Covers, and Domes.

LASER CUTTING

► Overview:

Crawford's Laser Cutting Division has three lasers. The largest is a 2000-watt machine, while the company has two smaller machines with a 2000- and a 1700-watt capacity. The division, compliments Crawford's long-standing tradition of excellence in specialty fabrication. Crawford presents complete services in reference to laser cutting, CNC punching, metal forming, and welding.

The main Balliu Cutting Center features two pallets, each measuring 78" (wide) x 157" (long). These pallets measure considerably larger than standard beds. The main machine has a cutting bed accuracy +/- .002" and was re-built in 2008. The smaller machines, which were also re-built in 2008, feature 60" x 120" beds for more efficient operation. All lasers are RoFin-Sinar.

► Markets/Material Specifications:

Mild Steel, Stainless Steel, Tool Steel, Aluminum, Plastics. Wattage: 2000- to 1700-watts; Pierce/Cut: 1" for plastics, 1/2" for mild steel, 1/4" for stainless steel and galvanized, and 1/8" for aluminum.

WELED FABRICATION, CUSTOM ARCHITECTURAL

► Overview:

Crawford's Welded Fabrication/Custom Architectural Division has played a key role in the corporate structure since 1985. The majority of this work has been implemented by Crawford's team of certified welders. Many projects are of stainless steel fabrication for a number of material handling, control panels, work stands, and many other support products for the manufacturing process. Other regularly performed services for customers include prototype fabrication, parts production, and sub-assemblies for manufactured products.

The division may be summarized in five general categories: Food Processing Projects, Environmental Control, Ventilation Systems, Custom Architectural Products, and Special Projects.

► Markets/Capabilities:

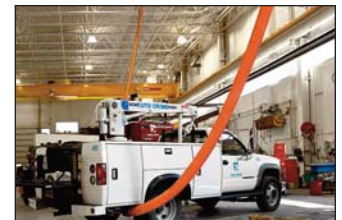

Production Forming, Environmental Control, Food Processing, Ventilation, Custom Architectural, Special Projects. Crawford offers a full range of fabrication equipment capable to handle any material up to 3/8" plate. Equipment: plasma cutter, program punch, press brakes, three lasers (2000-to-1700 watt), shears, power rolls, ironworkers, welders, saws, and more!

► Overview:

Monoxivent provides smart and innovative air cleaning solutions for customers in workspace environments. Since 1953, Monoxivent has offered products that capture fumes and particulate at the source. Monoxivent became a division of Crawford Co. in 2000 and goes to market through a national distribution base.

► Products:

Vehicle exhaust extraction systems, hose reels, overhead and underground exhaust systems, source capture flex arms, portable filter units, wall mount filter systems, cartridge collectors with air pulse cleaning, cyclone dust collectors, free hanging filter units, and custom design build services for special requirements from our customers.
