Monoxivent creates smart and innovative air cleaning solutions for customers in workspace environments. Monoxivent systems eliminate hazardous fumes and particulate at the source.

COMPANY OVERVIEW

Crawford Company, along with subsidiary Monoxivent, operates out of a 50,000-square foot facility along the banks of the Mississippi River in Rock Island, IL (Quad Cities). Together the companies employ 75 individuals.

Crawford, founded in 1952, began as a residential HVAC contractor. Over time the company evolved into the commercial HVAC market and diversified into the specialty fabrication/laser cutting markets. Crawford goes to market in commercial, industrial, and residential markets in the Illinois/Iowa region.

Monoxivent, founded in 1953, partnered with Crawford, following an acquisition in 2000. Monoxivent has been a clean-air solution provider by offering source capture systems and products to for toxic vehicle and dust/fume particulate. Monoxivent goes to market through a nationwide network of sales representatives.

Together the companies have been ranked as one of the fastest growing by the *Quad City Business Journal* and has received numerous safety awards, including a 2003 honor from SMACNA at the national level.

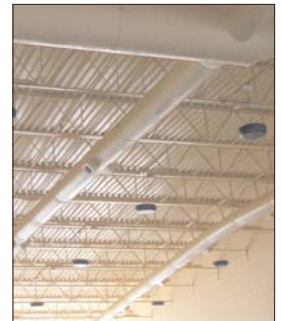

Fabrication/Manufacturing Facility (above) and Corporate Office Facility (below)

COMMERCIAL HVAC

Since the mid 1970's the company has expanded HVAC operations into commercial and industrial endeavors.

Five commercial estimators begin the process by gaining jobs for the company. These individuals plan and build to carry these projects through completion.

The estimators join forces with shop and field employees to see jobs through completion, giving the company a total team effort. Commercial projects have a varied range, up to several million dollars in scope.

RESIDENTIAL HVAC

A division within the company since 1952, Crawford Residential has become the area's premier HVAC contractor.

Crawford has the best technicians and installers, this coupled with two excellent product lines - BRYANT and LENNOX - makes Crawford a great decision for you and your family.

Contact Crawford for emergency service, new installations, or replacement work.

Ask about our maintenance agreements and parts/labor guarantees. Crawford offers free estimates for Illinois and Iowa customers.

WELDED FABRICATION CUSTOM ARCHITECTURAL DIVISIONS

The Specialty Welded Fabrication Division has played an integral role in the corporate structure since 1985. The majority of this work has been implemented by Crawford's team of specialty welders.

A major emphasis for these projects has been the food processing industry. Many of these projects are of stainless steel fabrication for a number of material handling, control panels, work stands, and many other support products for the manufacturing process. Other regularly performed services for customers include prototype fabrication, parts production, and sub-assemblies for manufactured products. The company also welcomes other varied requests related to this field. Crawford offers a full range of fabrication equipment capable to handle material up to 1/4"-plate. Heavier materials are available through "out-source" services. The Specialty Welded Fabrication Division may be summarized in four general categories: Food Processing Projects, Environmental Control, Ventilation Systems, and Special Projects.

Crawford also specializes in custom architectural products. The company offers a "design house" with an emphasis on custom fabrication. Many products incorporate stainless steel and copper, however other types of metals enhance the diversity within the offering. The product mix includes: signage, accents, light fixtures, water bowls, stainless steel water falls, tables, facade enhancements, and other treatments.

SERVICE HVAC

Crawford's Service Division has a long standing tradition of providing effective and efficient work on all makes and models of HVAC equipment. Crawford has only the best technicians and performs work in residential and commercial markets. Crawford provides routine clean and checks, in depth analysis and repair, and after-hour emergency service.

Crawford's Service Agreements provide preventive maintenance in commercial & residential markets!

LASER CUTTING DIVISION

The Laser Cutting Division provides customers with precision cuts for mild steel, stainless steel, tool steel, aluminum, and plastics. The cutting center is the largest in the Quad city Area.

Crawford has three cutting centers in its' facility. The largest is a 1700-watt machine, while the company has two other smaller capacity 1350-watt machines.

The large laser features two large pallets, each measuring 78" (wide) x 157" (long) and a 2000-lb. capacity. The smaller 1350-watt machines feature 60" x 120" beds for more efficient operation. The smaller machines have a 1000-lb. capacity.

The laser has a pierce/cut at 1" for plastics, 5/8" for mild steel, 1/4" for stainless steel and galvanized, and 1/8" for aluminum. The plasma has a pierce/cut at 1 1/4" for mild steel and 3/4" for stainless steel.

MONOXIVENT Source Capture Systems

Monoxivent creates smart and innovative air cleaning solutions for customers in workspace environments.

Monoxivent systems eliminate hazardous fumes and particulate at the source.

The manufacturing capabilities include a complete line of vehicle exhaust extraction systems, hose reels, overhead and underground exhaust systems, source capture flex arms, portable filter units, wall mount filter systems, cartridge collectors with air pulse cleaning, cyclone dust collectors, free hanging filter units, and custom design build services for special requirements from our customers.
