

## Application Spotlight

### **NORFI Rail Installed at Racine Railroad Products**

#### **Application Spotlight Location:**

Racine Railroad Products  
Racine, Wisconsin

#### **Monoxivent Sales Rep:**

Air Flow, Inc.

Racine Railroad Products utilizes a test facility to operate equipment in a simulated field environment. It is paramount for the facility to remain exhaust free and clean for the health and safety of the workforce. The track is used for final product testing.

Racine Railroad replaced an older hose system with the state-of-the-art, highly efficient, NORFI extraction rail. The rail eliminated the need to manipulate large sections of hose. The NORFI system includes a user-friendly extraction trolley with nozzle and a short section of hose.

Racine Director Don Ball and his staff find the system to be a smooth and simple solution for indoor air quality.

#### **About Racine Railroad Products:**

Our manufacturing plant and corporate office, located in Racine Wisconsin USA, has been designing, manufacturing and servicing quality maintenance-of-way equipment to the railroad industry since 1970.
